

Thanasis Argyriou

Senior Data Scientist & Machine Learning Engineer,
University Instructor in Python, ML & AI
with proven distinctions & expertise in
end-to-end ML on Azure, MLOps, statistics,
experimentation, Data Engineering & Education

Athens, Greece

Distinctions

Nvidia Inception membership	Prepared the successful application to the NVIDIA Inception Program, showcasing <i>Run4more's</i> AI/ML algorithms, Feb. 2026.
\$150.000 Azure Sponsorship	Led the evaluation process of successive interviews and technical assessments of AI/ML readiness, relevance and applicability, securing for <i>Run4more</i> a Microsoft sponsorship of Azure credits and expert assistance, Jul. 2025.
\$5.000 AWS Sponsorship	Led <i>Run4more's</i> acceptance into the <i>Amazon AWS Activate</i> program for Startups, awarded AWS credits and other benefits, Oct. 2024.
Digital Governance	2nd place Award for the <i>Best Applied Idea</i> in Economy, Development and Entrepreneurship, for <i>Developing a digital tool to inform and guide SMEs in selecting modern financial tools</i> . Nov 2023.
Digital Innovation	Honoured with distinction Award at the 1st Innovation Competition of the <i>National Program for Procedures Simplification</i> for redesigning the procedure <i>Characterization of Sustainable Urban Mobility Plans</i> Feb. 2023.
€30.000 Grants	Won an award at the 1st proof of concept Science Agora competition from a Consortium of Universities and Research Centers supported by Google , for implementing <i>Sustainable Urban Mobility</i> ML algorithms, Jul. 2022.
Top teaching quality recognition	For six successive years among the top tutors at the M.Sc. Post Graduate Programme of the Department of Economics - EKPA, according to yearly students' evaluation reports.
EC recognition	Created an Information Hub for SMEs financing that was promoted as a <i>good practice</i> at a European level in a European Commission Report .
Brazilian Jiu Jitsu Champion	Four times Panhellenic Gold medallist in Gi and No - Gi championships (2022 - 2024). Silver medallist at the Masters International Brazilian Jiu Jitsu Federation Gi tournament, Barcelona, May 2024.

Professional Experience

1/2025 - Present

Senior Data Scientist - Analyst.

*Tactical Edge
Technologies*

- Owning the end-to-end delivery of production ML solutions, from problem definition, exploratory data analysis and feature engineering to model development, validation, deployment and maintenance: supervised and unsupervised learning, forecasting, classification, clustering, anomaly detection, trajectory prediction and computer vision on diverse spatio-temporal datasets.
- Working directly with stakeholders to translate ambiguous operational questions into clearly defined analytical problems, measurable objectives and appropriate modelling approaches, leading requirements gathering and presenting model behaviour and findings through data visualization and storytelling.
- Building the data and serving infrastructure end to end: high-throughput streaming and batch ETL/ELT pipelines with Kafka, Apache Flink and Byte-wax on Kubernetes, feeding low-latency model-serving APIs, and partnering with data and platform engineers to guarantee the availability and quality of the features ML solutions depend on.
- Taking models from proof-of-concept into production with MLOps practices: model versioning and registry, automated deployment, drift-triggered retraining, and the monitoring, reliability targets (SLIs - SLOs for latency and data freshness) and dashboards that drive incident response.
- Establishing software engineering practices for ML: testing and data-quality standards (data validation, model correctness) packaged as reusable libraries, data contracts across teams with Pydantic and FastAPI, and CI/CD pipelines with Jenkins, GitHub Actions and pre-commit hooks.
- Applying responsible AI practices across the model lifecycle: SHAP and permutation feature-importance for explainability, subgroup performance analysis with bias detection, mitigation, data-representativeness checks.
- Forward Deployed Engineer: delivering and operating the same ML platform across cloud, on-premise and fully air-gapped environments, deploying container images to Kubernetes with Helm, treating cross-platform portability and reproducibility as design requirements.
- Mentoring and onboarding junior data scientists on ML methodology and engineering best practices, and reviewing the code deliverables of external partners against agreed standards and acceptance criteria.

7/2020 - Present **Lead Software Developer, Data Analysis & Visualization Expert, Lead Database and Machine Learning Engineer.**

*Startup
Run4more,
Cofounder &
Chief
Information
Officer*

- Leading the Python DS and backend teams and coordinating an external mobile-development partner; driving product development.
- Architecting end-to-end streaming and batch data pipelines orchestrated with Dagster, with the schemas, storage and APIs behind them.
- Running the ML and analytics workloads on Azure Databricks (notebooks, Spark, Delta tables, jobs; native MLflow tracking and model registry) and Azure ML, on Azure and AWS infrastructure automated with Terraform and Docker and \$155.000 in sponsored credits.
- Designing and shipping production ML: activity-forecasting models and incentive - reward pricing mechanisms over behavioural, geospatial and temporal data, and running randomised, controlled A/B tests on incentive parameters, feeding validated insights back into the product.
- Building live, interactive analytics and visualization dashboards for internal teams and client-facing use cases.

3/2019 - Present **Contracted Python Instructor, Teaching Assistant, Dissertations Supervisor**, National & Kapodistrian University of Athens (EKPA), Department of Economics.

*M.Sc. in
Business
Administration,
Analytics &
Information
Systems*

- Teaching non-independently: *Python for Data Science, Machine Learning & Artificial Intelligence* ([GitHub repo](#)).
- Teaching Assistant in *Quantitative Methods & Business Analytics*.
- Research Seminars Instructor: *Software Development Tools* ([GitHub repo](#)).
- Supervisor of 18 M.Sc. dissertations applying ML in practice: classification, computer vision, NLP, LLM fine-tuning, time-series forecasting, fraud and intrusion detection, and data engineering pipelines.

8/2014 - 12/2024 **Data & Statistics Analyst; National Delegate to the OECD & European Commission**, Contributing to the [Financing SMEs and Entrepreneurs: An OECD Scoreboard](#).

*Ministry of
Development
GR,
General
Secretariat for
Industry*

- Lead role in the statistics and economics Projects of the [National Observatory for SMEs](#) ([econometric models on SMEs' contribution to the Greek economy](#) and [SMEs Competitiveness](#)); National Delegate to the *OECD CSME Steering Group* and the *EC SME Policy Research Group*, presenting analyses to Ministry leadership and public-fund Investment Committees.
- Account manager for the Directorate's Monitoring Information Systems, designing the State Support MIS to automate regulatory compliance under strict data privacy, governance and audit requirements.

Software stack

Python	Expert in the scientific Python ecosystem: Pandas, Scikit-learn, PyTorch, Polars, Matplotlib, HoloViz, Streamlit, FastAPI. Expert in dependency management and reproducible environments with uv and Poetry.
Statistics - ML	Supervised and unsupervised learning, forecasting and time series, experimentation and A/B testing, model evaluation and validation. Responsible AI: explainability (SHAP, feature importance) and fairness / bias checks. Proficient in working with  in combination with Python.
SQL - Databases	Expert in SQL and in modelling structured and analytical datasets: PostgreSQL, DuckDB, MongoDB, familiar with Firebase.
Azure - Cloud	Hands-on with Azure Databricks: notebooks, Spark, Delta tables and jobs. Working knowledge of Azure Machine Learning. Deploying and operating ML systems at scale on Microsoft Azure and AWS, backed by \$155.000 in sponsored cloud credits (Microsoft, Amazon, Nvidia programs), and equally on-premise and in air-gapped environments.
MLOps	Expert in Docker, MLflow (GitHub repo), Terraform. Model versioning and registry, deployment, monitoring, automated retraining, model and data drift detection. CI/CD for ML pipelines with GitHub Actions and Jenkins. Good working knowledge of Kubernetes and Helm.
Data Engineering	Expert in ETL/ELT pipeline orchestration principles and design, working interchangeably with Airflow and Dagster. Good working knowledge in Kafka, Apache Flink, Bytewax and Lakehouse - Data Warehouse architectures. Data modelling, data quality and validation.
GenAI - LLMs	Good working knowledge of LLMs, RAG and embedding pipelines, and agentic systems: Hugging Face, LangGraph - LangChain, MCP servers, Azure AI Foundry agents. Proficient in Prompt Engineering, building skills and agent harnesses.
Git - Quality	Proficient user of git and GitHub. Enforcing code quality standards with automated testing, static type checking (mypy, Pyright) and automated linting (ruff) via pre-commit and prek hooks.
Computer Vision	Good working knowledge in Computer Vision, Image and Optical Character Recognition: Roboflow, Ultralytics, Yolo, OpenCV.
Linux - Tools	Expert in remote servers: OS setup from scratch, file system, services automation. Agile, Jira. VScode, PyCharm, L ^A T _E X, Obsidian.

Certifications

7/2025	DataExpert.io DE Excellence Certification : production data engineering with Spark and Databricks: modelling, quality and streaming pipelines.
11/2024	AWS Data Engineering Professional Certificate (Coursera).

Education

- 2012 - 2014 **Qualified Public Administration Executive**, *National School of Public Administration & Self-government (ESDDA)*, Department of Administration & Financial Management, graduated with Honours of Excellence.
- 2009 - 2011 **Master of Philosophy in Economics**, UADPHILECON - *Doctoral Program in Economics*, Department of Economics, University of Athens.
- 1997 - 2007 **Bachelor of Statistics & Insurance Science**, *Department of Statistics & Insurance Science*, University of Piraeus.

Languages

- English **C2** Certificates of Proficiency: University of Cambridge, University of Michigan. Graduate of an English-speaking Postgraduate Doctoral Program.
- Spanish **B1** DELE – Nivel Intermedio, Instituto Cervantes *83.83/100*
- German **A2** Deutch als Fremdsprache – Zertifikat, Goethe Institut *109.25/120*
- Greek **Native Speaker**
